DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 1, lines 1-4 are unclear because it is uncertain if *each* plate or the second plate only is to be $\frac{1}{2}$ wavelength. Claims 12 and 23 also contain this problem. In lines 8 and 12, the language "may be" is unclear and not a positive statement of the orthogonal nature of the straight lines recited here because it may imply a variable which may not necessarily cause the lines to be orthogonal.

Claim 12 also includes this problem in line 8.

2. The patents to Rammos (5061943), Rahm et al. (5661494) and Bondyopadhyay (5714961) are cited of interest showing orthogonal feeders without the specific 45 degree arrangement, multi-level feed arrangement and wavelength dimensions claimed here.

Allowable Subject Matter

3. Claims 1-34 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
